

Slovenian Discrete and Applied Mathematics Society

We are very pleased to announce the formation of the Slovenian Discrete and Applied Mathematics Society, in Koper (Slovenia), on 14 December 2016. The aim of this society is to promote the mathematical sciences, with special emphasis given to discrete and applied mathematics. The Society is research-oriented, and will publish scientific literature and organise scientific meetings. In particular, it will be involved in publishing *Ars Mathematica Contemporanea*. It will have members, fellows and honorary members.

A ‘Member’ may be any individual actively engaged in mathematical research, as evidenced in practice by authorship of a paper covered by *MathSciNet* or *Zentralblatt für Mathematik*, or by enrolment in a research degree (and supported by a recommendation letter from the student’s supervisor).

A ‘Fellow’ is a member who has strong international visibility and has made a positive impact on mathematics in Slovenia. Typically, a fellow would be expected to have at least 500 citations in the *MathSciNet* database, or be noted for some other achievements (such as an international award, or having given a keynote address in a large conference, or supervised a PhD student in or from Slovenia).

An ‘Honorary Member’ is an individual who has made outstanding contributions to the development of discrete or applied mathematics in Slovenia.

The Society will have a Nomination Committee, for nominating candidates for fellowship, and for considering candidates for honorary membership. Under the current rules, the General Assembly of the Society will elect new Fellows and a limited number of Honorary Members at its annual meeting each year.
