Abstract

A split weak metacirculant which is not metacirculant is simply called a *pseudo metacirculant*. In this paper, two infinite families of pseudo metacirculants are constructed.

Keywords: Metacirculant, metacyclic, split weak metacirculant.

Povzetek

Razcepljen šibki metacirkulant, ki pa ni metacirkulant, se imenuje *psevdo metacirkulant*. V tem članku konstruiramo dve neskončni družini psevdo metacirkulantov.

Ključne besede: Metacirkulant, metaciklični, razcepljen šibki metacirkulant.

Math. Subj. Class. (2020): 20B25, 05C25
